# **GRAND JURY** FINDS MUCH TO CONDEMN

### Transition Period The draining system of the place is to be rondemied. Mauka of the main enclosure is an open ditch, which runs Prisoners Are Indicted.

FTER over a month's active ser-A vice the Territorial brought in its final report yesplete and exhaustive and goes into detail as to the investigations made by the jury during its long term of service. The report follows:

Honolulu, Oahu, T. H., October 24, 1901. Honorable George D. Gear, Second Judge, Circuit Court, First Judicial District, Territory of Hawaii:

Sir-The grand jury duly empanelled and sworn and charged before you on the 19th day of September, 1901, having concluded its duties, begs to submit herewith the following general report

The Deputy Attorney General has brought to the attention of this grand jury seventy-one cases, all of which have been carefully considered and in fortynine cases, true bills of indictment have been found and returned to your honorable Court, and as to the balance of the cases, numbering twenty-two, no bills have been returned, as the evidence ad-duced was not deemed sufficient to warrant convictions on the respective charges preferred.

Pursuant to the general instructions contained in your charge, the grand jury the asylum. has seen fit to inquire into the conduct of various Territorial institutions, as well as into the administration of certain functions of the Board of Health and of the Department of Public Works, and in connection therewith, beg to report fur-

THE HOSPITAL FOR THE INSANE. The visit of the grand jury to the Territorial Insane Asylum was made on Monday afternoon, October 7th, at halfpast one o'clock. The jury was met by the recently appointed superintendent, Dr. R. N. Malster, who is also resident physician, and accompanied by Mr. Kil-by, the assistant superintendent, proceeded to inspect the buildings and grounds

permit.
The location of the asylum is well chosen, the summer heat being tempered by mit, cool winds from the nearby mountains.

The grounds are well shaded and neatly is not kept, and the various buildings standing detached about the lawn are also kept in orderly condition, and the general ap-

To the rear and mauka of the men's the adjacent hillside, being blasted in large masses from the main ledge, and through the machine, it is elevated and sereened into assorted sizes and stored in bins, whence it is hauled off as need-

ed by the Street Commissioner. The continuous rattle of the revolving lum enclosure.

for patients, an administration building, to the attention of this another for the guards, one for the womcon attendants or nurses, and a small its size and appointments shall be in dead house or morgue. The wards or committees consist of rooms with bare floor and walls, called cells, which in fact they are. They are usually furnished with an iron springless cot and bedding though in many instances the mattresses are laid upon the floor, as there are not garded advisable to limit the furnishings o a mattress, pillow and quilt.

Ward number six has twenty cells,

good range, but otherwise its equipment

Ward number three has thirty-two cells, occupied by thirty-three patients. Here the floors are more or less rotten. The cells have overhead ventilation, and the solid doors are fitted with a small

Ward number four is women's ward, and had normal accommodations for nineteen patients, yet thirty-three women are now housed there, many sleeping on the floors of the cells, owing to the scarcity of cots. In this ward the ventilation is better than in some others, the

ceiling being of open work.

Ward number five is a private ward for pay patients only, and is not in use.

The bathing facilities for men are good. The women's quarters are provided with

close to the men's sleeping quarters. In this ditch stands continually all the slop from the kitchen and the wash houses, and the stench arising is most offensive What runs off empties into a larger ditch which receives also the slops from the poi house. The sewage from the men's closets empties into cesspools, but the women's closet is built over a vault and the building itself needs repairs. A sanitary system of sewage should be installed and the health of the inmates be safeguarded from the danger of the stagnant ditches show described.

nant ditches above described.

The patients numbered, on the day of our visit, 156, of whom 118 were men, 38 women. There is no work provided for the inmates except for a very few in the taro and garden patches, and about the kitchen and wards. Neither are there any forms of amusement, and there is no music, nor are there any appliances for physical exercise, nor outdoor games encouraged for either

We would recommend that for every patient who is able to work at all, some employment, however light, be provided, and that rational amusements and physical exercises be introduced as far as practicable, so as to mitigate as far as ossible the condition of the unfortunate inmates, who are deserving of the widest sympathy of our citizens and of the considerate care of the government of the

Finally, we would recommend to the attention of the honorable court and to the law-making power of the Territory, the propriety of changing the method now in vogue regarding commitments to

A magistrate, on the certificate of a single doctor of medicine, should not commit any person to the insane asylum, and in all cases the patient should be produced in court. And we would sug-gest that a commission of at least three doctors, one of whom shall be a specialist in nervous diseases, pass upon the merits of every proposed commitment before judgment be rendered in the case, and we further suggest that from time to time, a visiting commission of three well qualified physicians might well be appointed to visit the asylum to ascertain If all the inmates thereof were properly treated and rightly detained therein.

#### THE REFORM SCHOOL.

and methods of management as far as the limited time at its disposal would permit.

This institution was visited by the grand jury next after the insane asylum. It seems to be kept as well as the present facilities and appropriations will permit. The great need of the institution is occupation for the boys. At present there is nothing outside of the primary school, to supply this need, except a small carpenter shop. In order to maintain a proper system of discipline over a numpearance of the institution is to be com- ber of boys gathered from the streets, as most of these boys have been, they should be given employment. The grand wards, though in the asylum grounds, jury strongly recommends that a farm stands a large stone-crushing plant, be established in connection with the owned by the Territory and operated by school, where the boys will not only be the Department of Public Works. The taught the ordinary operations of the rock to feed the crusher is quarried from farm, but also brought under the wholesome influence of an outdoor life.

As there is no regular medical attendance at the school, the jury recommends large masses from the main reose, and ance at the school, the jury recommendation of the proper size for further that the prison physician be instructed to make periodical being the reduction by the crusher. After passing to make periodical thereto. The reduction by the crusher it is elevated and additional expense would be comparately to make the comparately the red tively slight, and these wards of the Tertention.

#### THE CAHU PRISON.

screens is distressing to many of the pa-tients, and the blasting of the rock is not only an additional cause of disturb-commends the efficient manner in which ance, but a source of imminent danger the institution is conducted. Its investi-to the life and property within the asyseveral places the kitchen and the food, and it was The jury was shown several places where stones had fallen on buildings found that everything proper was being with sufficient force to bend the iron rooming, and in one of the wards a rock had evidently plunged through the roof to the main floor below. To minimize the danger to the patients, warnings are given before each blast, and all are huddled under cover until the blasting is offenses with those under seatence for died under cover until the blasting is one. The plant, though stopped for a while past by orders from the Board of United States witnesses and convicts, then the federal Court for petty Health, has started up again, and we sentenced in the Federal Court for petty would earnestly recommend that further offenses, as well as serious cr.mes; and blasting be prohibited, and that the crushing plant itself be removed from the asylum grounds and their vicinity. The buildings of the asylum are one story frame affairs, and consist of six wards a cottage for the captains of the guard, legislative powers of the Territory the great need of a new prison, one that in its size and appointments shall be in

### POLICE DEPARTMENT.

On our visit to the station house we enough bedsteads to accommodate all the order, with the exception of the stove, Yet in some cases it is re-which we condemn, and recommend that visable to limit the furnishings a new one be installed at once. The sanitary conditions we found in good order Ward number one, known as the vio-lent ward, consists of eighteen cells, all secupied. Its ventilation should be im-so many drunks in one cell. More cells are needed now than in former days, on account of the new immigrants that which are poorly ventilated, and eight are coming to the Islands. There seems of them are without cots, mattresses be-ing placed on the floor. Eighteen cells could be placed, and we recommend are available, and there are seventeen the building of them as soon as possible. men in the ward. The roof of this ward We also recommend that there should be has been punctured by a rock from the a property room and a clerk in charge quarry blast. Ward number two is the We found two and three cells filled with oldest ward in the asylum, being built in 1886. It is in a bad state of repair, and though, as we were told, it has been condemned three times by different grand for the use of more prisoners. We considered the condemned three times by different grand for the use of more prisoners. We considered the condemned three times by different grand for the use of more prisoners. condemned three times by different grand for the use of more prisoners. We conjuries, it is still crowded by occupants, demr the practice of the police departthere being thirty-seven in its one large ment being made to act as public admit-room, all of which are in use. Its floors istrators, and having to take charge of and porches and foundations are decayed and keep in their possession for an un-and the building is unfit for its present limited time, large quantities of furni-

and porches and foundations are decayed and the building is unit for its present occupancy. In this busings are the men's dining room and the general kitchen from which the meals of the women patients are carried to them in baskets, and are eaten by them on the grass in fair weather, and otherwise on their ward porches, as their ward dining room has been turned into a dormitory, owing to the crowded condition of their quarters.

The general kitchen is furnished with a good range, but otherwise its equipment

some six months awaiting a hearing. is primitive, there being no steam-table. We heartly approve of the new police or any of the improved cooking appliances usually found in similar institu-tions in other states and territories of to the department, as well as a better the Union. The utens is are old and bad-protection to citizens. We would respectly worn, and for drinking cups the pa-tients use old tomato cans, there being grand jury to the fact that there is still no other cups provided. a large amount of illicit distilling going

slaughtered by the last legislature that children, unlesss due notice there if b it has hampered the present efficient po- first given to their parents or guardians lice officials, in not being able to give the. The grand jury would respectfully call citizens the police protection they are the attention of your Honor to the trivial entitled to. We find that sums of money character of many of the offenses ware constantly being paid out of the pri-amined into during its session just closvate resources of the high sheriff and his ed, which included larceny cases where deputy, in earing for the public safety, the amount of loss involved did not exand would suggest that the auditor be coed fifteen cents in value, or consisted more liberal with the police department emergency fund. We recommend that dress, or a common rooster. It deems it the police force be increased, as the present force is not sufficient. We find there men should freely serve the community are twelve mounted police, six doing day duty and six night duty. Each watch doine duty from the transverse stables the constitutional right of a secret investment. doing duty from the tramway car stables the constitutional right of a secret inves-at Palama to Kapiolani Park, including tigation as to his probable guilt or in-Nuuanu as far as the tram terminus, nocence, but it submits to the candor of Beretania street mauka, and to Punahou, occurrence, which seem properly to be without any police protection day or long within the jurisdiction of a police

without any police protection day or night.

A tour of inspection was made, accompanied by the deputy sheriff, on the night of October 19th, and many nototious places were visited. We feel that the police force is doing everything possible in their power to patrol that part of the city where so much vice exists, with the limited number of men at their command. We would call the attention of the Board of Health to the unsanitary condition in and about Palame, and especially around the Chinese theater on Lillah street. The oder arising from nuisances is very nauseating, and very dangerous to the community. We think that a general cleaning up of this part of the city would be in "ori It seems to "nis jury that if the last legislature had attended in their duties as public servants."

were found to be in a wretched condi- in like good order and condition as when tion. They should be drained and graded first entered by us. tion. diction, and where claimed as property of private persons or corporations, they should be improved thereby at the compulsion of the Board of Health, as they constitute not only a nuisance but are a menace to the health of the entire neighborhood. Under the present the Board of Health authorizes the struction of dwellings upon ground that has been raised to a level of four feet above tide datum, but it does not compel the filling of the streets upon which it abuts or of adjacent property. The result is that hundreds of people are living amidst unsanitary surroundings. The grand jury therefore recommends that the streets in the neighborhood of the junction of Queen and South streets and makai thereof be put in a passable and sanitary condition, and that in the future dwelling house permits be withheld as to lots in low lying districts until the sur roundings thereof shall also have be put in proper sanitary condition. Although but little money comparatively speaking is expended upon the streets of this section the road taxes thereof alone amount to hundreds of dollars each year, while the total assessed value of real estate for the year 1900 exceeded half a million dollars, and taxes collected for the same period exceeded \$8,400, which figure will show a targe increase for the

In this district, poles carrying light of telephone wires, were found to be placed outside of what would be proper curb lines, thus obstructing the free passage of vehicles in the present roadway. Two large frame tenement houses were inspected in this district, which were occu-pled by people of a half-dozen different nationalities. Violation of sanitary and other regulations were noted which have since been called to the attention of owners, agents and proper Territorial authorities. With the regard to the building laws of the Territory, the grand jury found that the administration thereby the Department of Public Works. while in compliance with their letter was to a large degree ineffective in that while building permits are only issued upon the approval of plans and specin-cations first filed with the department, actual inspection of the buildings themselves while under construction or upon completion, is not made, and variations ! from plans and specifications can easily effected, without detection or rance. The old law, which required approval of building plans by the fire hal, seems to have become ignored with dictments the abolition of that office, that duty not having been specially placed upon the chief of the fire department since its reorganization on a salary basis. As a result proper attention to the erection of chimneys and of stairways for fire escapes is lost sight of,

The grand jury found six saloons established in a contracted area to the said district of the city, and while it was in-formed by the high sheriff and the Territorial treasurer that beer licenses were granted largely in order to diminish the manufacture of and indulgence in swore swipes and "okolehao," which result had been practically achieved with fewer arrests for drunkenness than formerly by Tom Aukla, the police, nevertheless it would recom- second degree mend that, as in heretofore indicated. the Pederal authorities use the means within their power to break up by mary measures the illicit manufacture of all kinds of liquor, so that amongst other good results, the matter of the granting of saloon licenses may be put upon a legitimate basis.

In the matter of the discontinuance night schools in the city of Honoluiu. the grand jury is of the opinion that such action was unwise, for the general reason that ignorance and crime often go hand in hand, and for the special reaon that drunkenness, at least, seems, by reliable testimony, to have increased in special localities since these schools were abandoned.

The grand jury has seen fit to inquire into the practice under the old estab ished regulation of the Board of Health which requires physical examination at leas tonce a year by government phy-sicians of all children in public and private schools, not provided with health certificates in order to detect contagious and infectious diseases. While this rule undoubtedly acts as a safeguard to the public health, the grand jury finds upon investigation of the various methods under which it has been carried out on this and other Islands and in the city Honolulu, that there is much in them to condemn. When it is known that the authority given to the physicians under this rule is without qualification or restrictions, so that boys and girls (often-times entirely disrobed) must submit to

on in and about Honolulu, and that, al- should be adopted in the premises, so on in and about Honolulu, and that, although the attention of some of the Federal officers has been called to it by the police department, they have not seemed to pay any attention to the information. We also suggest to the judges of the police courts that they infliet more severe sentences in the many vagrancy cases. In giving this class of people the limit of the law, we think vagrancy priations for the police department, so tion be made by any physician of any slaughtered by the last legislature that children, unless due notice there is be

#### JURY IS THANKED.

Judge Gear in discharging the jury thanked the members heartily for their strict performance of the duty laid out for them. "I was much interested in the requirements arbitrarily fixed by the the report." he said. "and it gives me respective physicians, it will at once be great pleasure to see how the memapparent that positive rules of practice bers of the Grand Jury grasped the

idea of what they were expected to do. and I wish to sincerely thank you for the way you have gone about the work and carried out the suggestions of the court. You have gone into the matter thoroughly and I will see that your excellent report is not pigeonholed. reforms suggested by you will be called to the attention of the proper authori-

The insane asylum especially must be attended to immediately, the anditions reported there are appalling and should be looked into at once. I shall also see that the attention of the Federal Jury is called to the matters meritioned in your report."

The court also stated his thorough accord with the suggestion of the grand jury that their time should not be taken up with trivial cases, and stated that their report would be a guidance for future grand juries. Concluding he said: "This grand jury was a grand grand jury, and I would like to have you serve in that capacity again."

The jurors however did not take kindly to the suggestion, and filed out of the court room, pleased to escape.

#### KIPLING'S PEN OUT AGAIN. Article Denouncing Impotence of British Army Chiefs.

LONDON, Oct. 12,-"In spite of the pledges of the government, the whole army machine is to be hauled back as soon as it may be to the old ruts of impotence, pretense and collapse," writes Rudyard Kipling in a striking letter to the Speciator upon the appointment of Sir Redvers Buller and Sir Evelyn Wood

to command army corps.

This pungent sentence voices the na-tional feeling which has prevailed this week without regard to party politics.
"Men see," adds Mr. Kipling, "that the chosen commanders are not quite in touch with the real army, which with a little tact and a little seriousness might so easily survive. It is not the triviality or inaptitude displayed in this matter that appals, but the cynical levity."

Thomas W. Lawson is reported to have lost \$7,000,000 by a recent slump in opper.

Mrs. Mary Witmer, of Dayton, O., is charged with poisoning four husbands and her sister. She is now on trial for murder.

Importations into the Philippines from the United States are dutable the same as if imported from a foreign country, notwithstanding the recent decision of the Secretary of the Treas-ury that the Philippines are under the jurisdiction of the United States.

A cable to the World from Berlin says: Open-Bir treatment for tubercu-losis is astonishingly successful in Germany. Out of 142 cases in Hanover, 121 are pronounced cured; in Saxony, out of 98 patients, 60 are cured, while in Baden, where the treatment is given in the pine woods of the Black Forest, 205 cases have been cured out of 240 under observation. Leaflets describing the best method of combatting con-sumptive tendencies are distributed wholesale by the government.

#### CARD OF THANKS.

MR. AND MRS. R. WASSMAN EX-tend their heartfelt thanks to the many kind friends for their kind sympathy and assistance rendered during the serious illness and death of their be-
